

Family Services

*Imua Family Services and Maui Grown Therapies presents:*

## **An Evening with Greg Yim, MD**

Friday, October 21 at 4PM

Imua Family Services Conference Room

161 S. Wakea Ave, Kahului, Hi 93732

**Gregory Yim, MD** is an esteemed Honolulu pediatric neurologist and passionate patient advocate. Dr. Yim has been an Assistant Clinical Professor in the Department of Pediatrics for the University of Hawai'i School of Medicine since 1995.

Dr. Yim was unexpectedly thrust into the medical marijuana debate in 2014 when the parents of one of his pediatric patients requested it as therapy. He admits he does not fully understand how cannabis works as a medicine, but he has witnessed benefits for this particular patient. As a physician he believes more clinical research is needed using standard scientific studies. In the meantime, he remains open-minded and “cautiously optimistic” about its therapeutic potential.

He will speak with parents and caregivers of children with seizure disorders at Imua Family Services at 4 pm on Friday, October 21, 2016. He will answer questions about available therapy options.

To reserve your seat to this free event, call **(808) 244-7467** today.
